

PRESS RELEASE

STORMSAFE, A BESPOKE HURRICANE AND WINDSTORM PRODUCT, DEVELOPED FOR THE LOUISIANA FILM INDUSTRY

London 1st August 2006:

Stormsafe, a bespoke hurricane and windstorm product, has been developed for the Louisiana film industry by JLT Risk Solution's specialist sport and entertainment practice. This complements standard film production policies by responding to named perils not traditionally insured elsewhere.

Key features are:

- property damage (including damage/destruction of sets, props and wardrobes, and death, accident or injury to cast members)
- third party liability (for film equipment causing injury to members of the public)
- extra expense/loss of production time due to forced evacuation.

Jonathan Cole, Partner, JLT Sport says

"With the quantity of films now made in Louisiana, and the fear of further hurricanes/ windstorms this year, this product will give everyone involved in the film industry increased protection against uncertainty.

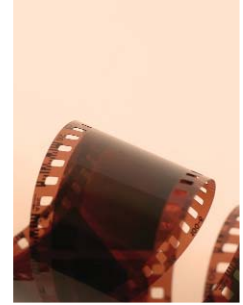

Standard "Film Production" coverages do not offer protection against hurricane/ windstorm losses during the windstorm season in Louisiana, which in turn means film production companies have no financial protection in the event of disruption to filming patterns/destruction of property.

Stormsafe allows film producers to focus their efforts on filmmaking, and removes the financial uncertainty that currently prevails."
